

BCF 209 - Acquisition Reporting for Major Acquisition Defense Programs (MDAPs) (Previously BCF 209C)

The Acquisition Reporting for MDAPs provides training on how to prepare an Acquisition Program Baseline (APB), and a Defense Acquisition Executive Summary (DAES), and a Selected Acquisition Report for Major Acquisition Defense Programs. Students complete pre-course material on-line prior to attending the classroom portion. During the in-class lecture and computer assisted case studies; the student learns step-by-step report preparation using the Consolidated Acquisition Reporting System (CARS) software.

Objective: Students who successfully complete this course will be able to prepare, generate and review CARS based acquisition reports, including the SAR.

Who Should Attend: This assignment-specific course is for military officers, 0-1 and above, and DoD civilians, GS-7 and above. It is generally limited to acquisition personnel whose assignment requires preparation or review of Major Defense Acquisition Programs or reporting using the CARS software. Civilians under contract to support a military program office with a reporting requirement are eligible with the recommendation of the Program Manager.

Recommended: ACQ101 and BCF103

Note: This course is for MDAP personnel.

Length: 4 class days.

Method of Delivery: Resident/Local
